Sunshine Canyon City/County Landfill Waste Acceptance Averages

The site has been operating as a Joint City/County Landfill as of January 2009. Waste acceptance averages for each month of the second quarter of 2016 are shown below. The site is permitted to accept 12,100 tons per day (TPD) maximum daily capacity (M-F).

Month	Non-buried, Recyclable and Beneficial Reuse Material (Tons)	Total Landfilled Material (Tons)	Averages (TPD)	
			Mon - Fri	Saturday
April	2,296	195,103	8,259	4,332
May	5,735	205,910	8,551	4,449
June	3,980	211,550	8,844	4,247

Notices of Violation

For the second quarter of 2016 Sunshine Canyon Landfill received 6 Notices of Violation from the SCAQMD related to odors: April 3rd, April 4th, April 18th, April 21st, April 22nd, and June 20th.

Two areas of concern were received from the SCL-LEA for the second quarter of 2016: One for litter control on April 15th and one for leachate control on June 17th.

Sunshine Canyon Landfill Hotline Report

- Operational 24/7
- Call for information about Sunshine Canyon Landfill including questions regarding disposal rates, tours, complaints or comments.
- Second quarter 2016 received 23 calls, 5 calls were from a SCAQMD inspector, and 2 private complaints reporting complaints to AQMD's hotline.

Landfill Gas Monitoring

The latest Rule 1150.1 Quarterly Monitoring Report was submitted in April 2016 for the first quarter of 2016. This report contains the results of the monthly surface emission monitoring (SEM) (instantaneous and integrated), results of the monthly monitoring of the site's perimeter gas probes and other information as required by SCAQMD's Rule 1150.1.

The results of the instantaneous SEM showed the following number of locations exceeding the regulatory threshold of 500 parts per million (ppm) Total Organic Carbon (TOC) for the reporting period: January - 29 locations on 333 grids monitored; February - 36 locations on 352 grids monitored; March - 18 locations on 329 grids monitored. The results of the integrated SEM showed the following number of grids exceeded the regulatory threshold of 25 ppm TOC for the reporting period: January - 10 grids out of the 333 grids monitored; February - 9 grids out of the 352 grids monitored; March - 10 grids out of the 329 grids monitored.

For this reporting period, the locations where the readings exceeded the regulatory threshold were either (1) repaired and passed the 3-day re-check and/or the second 10-day re-check as allowed by Rule 1150.1, or (2) the exceedances were addressed by expansion of the gas collection system by the installation of additional gas extraction wells.

Storm Water Controls

There is a comprehensive surface water management system at Sunshine Canyon Landfill that includes perimeter and interior drainage channels, four permanent sedimentation basins and several temporary basins to remove sediment from surface water leaving the site. The site operates under a statewide General Industrial Storm Water Permit. That permit defines the rainy season as Oct-May. Sunshine Canyon conducts monitoring of runoff water quality during that time in accordance with the site's permit requirements.

Operations Update

Sunshine Canyon Landfill site personnel are working closely with the Sunshine Canyon Landfill Local Enforcement Agency (SCL LEA) to implement a six-month demonstration project to enhance portions of the on-site intermediate cover using Posi-Shell®.

Posi-Shell® is a patented blend of clay binders, reinforcing fibers and polymers that, when mixed with water, produces a spray-applied mortar that dries in the form of a thin, durable stucco-like product. This product has been selected for this demonstration project due to its ability to be applied on slopes, ease

of application and potential for long-lasting benefits.

Throughout the demonstration period, site personnel will conduct daily visual inspections of the areas where the Posi-Shell® is applied and record the observations. In addition, surface emission monitoring will be continue to be conducted in these areas. At the end of the six-month demonstration project, all of the recorded data and observations will be submitted to the SCL LEA.

S.A.F.E. Centers

The Los Angeles City, Bureau of Sanitation operates S.A.F.E. Centers so residents can properly dispose of household hazardous waste materials such as Solvents Automotive Eflammables and Electronics. The closest S.A.F.E. Center to the Granada Hills area is located at:

10241 N. Balboa Blvd.,
Northridge, CA 91325
Hours of operation:
Saturdays & Sundays
9 am—3 pm

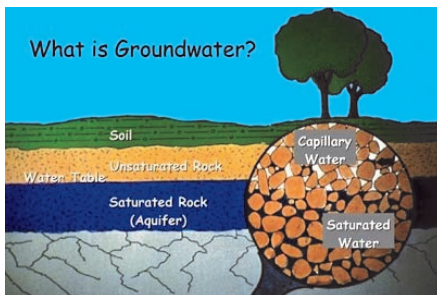

For more information, please visit the Bureau's website — www.lacitysan.org. You will find a complete listing of the materials that can be brought to a S.A.F.E. Center for free disposal.

Groundwater Monitoring

The Groundwater and Waste Disposal Monitoring Report for the Second Semi-Annual and Annual Monitoring Period of 2015 (RWCQB File No. 58-076) was published in February 2016. The report can be found at www.sunshinecanyonlandfill.com

Vegetation

The Vegetation Report for the first quarter of 2016 was submitted to the agencies in April 2016. This report details the status of the various vegetation activities that are being conducted on the site.

The sage pilot project continues to thrive with many new seedlings emerging. Quarterly monitoring is conducted by a third party biologist as well as a landscape architect consultant; these reports are included in the quarterly monitoring reports.
