

Continued Progress Installing Landfill Gas Infrastructure

January 26, 2018

SYLMAR, Calif. (Jan. 26, 2018) – The Sunshine Canyon Landfill team announced today more progress collecting and controlling landfill gas, a key component of ongoing site enhancements. This week the team installed four new vertical landfill gas wells in current disposal areas, along with hundreds of linear feet of landfill gas pipe in the newest waste cell to prepare for horizontal well installation. Additionally, the team took measures to further improve waste liquids flow, which supports effective and efficient operation of landfill gas infrastructure.
