

Additional Gas Well Installation Project Underway

April 6, 2018

SYLMAR, Calif. (April 6, 2018) – Earlier this year, the Sunshine Canyon Landfill team announced a project to install the first phase of new landfill gas wells as we continue to optimize and expand our landfill gas system. To date, we have installed 18 of the 26 planned wells.

Last month, we began construction on phase two of this project. Our team added a second drill rig on site to install an additional 26 wells. We have already installed 6 of these wells, and anticipate completing installation of both phases – all 52 gas wells – by the summer.
