

Sunshine Canyon Landfill to Install Additional Closure Turf

June 15, 2018

SYLMAR, Calif. (June 15, 2018) – In 2017, the Sunshine Canyon Landfill team installed closure turf – an impermeable synthetic liner overlain by artificial turf – over 21 acres of the Landfill to support landfill gas collection and control efforts. As an enhanced landfill cover, closure turf helps prevent landfill gas from escaping and reinforces landfill gas system enhancements we've made at the site.

This summer, we will install closure turf over four additional acres of the Landfill. The installation design has been completed, and material is currently being manufactured. We anticipate completing installation by July 31 and will keep you updated on our progress.
