

## Additional Closure Turf Installation Underway

July 13, 2018

**SYLMAR, Calif. (July 13, 2018)** – Last month, the Sunshine Canyon Landfill team announced plans to install closure turf – an impermeable synthetic liner overlain by artificial turf – over five additional acres of the Landfill. This week, we began preparing the subgrade surface where the synthetic liner will be laid over the coming weeks, followed by the artificial turf cover later in July. This closure turf is in addition to the 21 acres we installed in 2017 to support landfill gas collection and control. We will keep you informed as we continue making progress.
