Sunshine Canyon Landfill Ready to Assist our Community

November 16, 2018

SYLMAR, Calif. (Nov. 16, 2018) – As we have all watched the heartbreaking footage of yet another round of devastating wildfires affecting the Los Angeles area, the Sunshine Canyon Landfill team's thoughts are with those impacted by the fires and those working to fight them. We are fortunate the fires are not currently threatening the Landfill, but we are taking all necessary precautions and closely monitoring the situation. As always, we stand by ready to support in any way we can with response and recovery efforts as they are initiated.
