

Saddleridge Fire Reaches Sunshine Canyon Landfill

October 11, 2019

SYLMAR, Calif. (Oct. 11, 2019) – Last evening, flames from the Saddleridge Fire that originated near Stetson Ranch Park reached Sunshine Canyon Landfill and impacted the southern portion of the site. The Landfill is currently closed. Once it is safe to return, our Landfill team will assess potential damage and work with officials to determine when to reopen. We are working to redirect Los Angeles County waste disposal to alternate facilities during this period so that service continues with minimal interruption.

We sincerely thank the brave first responders and emergency personnel for their ongoing efforts to contain the fire and protect our communities. Our thoughts are with them, our community and all those affected by the fire. We will provide updates throughout the process as appropriate.
